To make an inclinometer

1. Cut out this shape

2. Glue protractor part of shape to piece of cardboard.

3. Make a pin hole at centre of protractor just big enough to thread string through.

4. Thread string through hole, leaving about 20cm dangling before tying on a nut or other heavy item. Tie a knot or tape the other end of string onto back of inclinometer to secure.

5. Roll the rectangle away from the protractor to form a looking tube.

6. Glue or tape down the looking tube.
