Play dough

**Ingredients**
2 cups plain flour  
2 cups warm water  
1 cup salt  
2 tbs cooking oil  
1 tbs cream of tartar  
food colour

**Method**
1. Mix all ingredients in medium saucepan.  
2. Warm over low heat and stir continuously.  
3. Keep stirring until mixture forms a dough and comes away from the sides. If not cooked long enough, the playdough will be sticky, so don’t give up early!  
4. Tip dough out onto workbench, allow to cool  
5. When dough is ok to touch, add a few drops of food colour and knead through.

*(makes about 600g playdough, enough for 30 meteorites)*

**WHAT’S INSIDE SPACE ROCKS?**
